

American Mini Storage – located on US 92 south of the mall about a mile – has been in operation for over 20 years. Formerly known as Central Self Storage – this location changed its name in early 2009. The Sierra Vista location is managed by All American Property Management, Inc. who manages over 50 storage properties across the south from Virginia to California.

At AMS we provide our tenants many features such as 365 day access via a pass code controlled gate, W-I-D-E driveways to accommodate personal trailers and moving vans, on site resident managers, monthly pest control, lighted driveways, and free e-mail rent reminders. We have room to park your car, RV or boat. Moving and packing supplies are available too!

Our units are vacuum cleaned, walls wiped down and bug sprayed before each new tenant moves in. We offer BUDGET rental trucks by the day or for one-way do it yourself moves. Both offices are open 7 days a week to discuss rates and availability or take payments.

AMS prices have always been competitive and we recently dropped prices even further. We do require each unit to have some form of insurance coverage – usually current business, home owners or renters insurance will suffice. Tenants can add insurance coverage to their monthly rentals for a small premium.

For our business tenants, we offer a “SHOP LOCAL” display in our reception area where they can display business flyers or business cards. And – we happily give referrals to newcomers who ask us for suggestions.

All leases are month-to-month with new tenants receiving their 2nd month FREE. We offer 15% military and 10% senior discounts off the monthly rates. Pre-pay discounts are always available. We accept cash, check, and money orders as well as VISA, MasterCard, Discover and American Express.

Come on down to AMS and check out one of our storage models – they are always clean and ready for your inspection!
