

Photography By Ty™ is a local small business in Sierra Vista, Arizona owned by Sheila and Ty Holland. Photography By Ty™ the largest provider of digital photography in Cochise County. The business offers the full spectrum of photography services to include but not limited to Action Sports, Documentary, Feature, Fashion/Model, Events, Portrait, Remote Controlled, Commercial, and Equestrian Photography. In the area of Feature Photography Ty Holland has three Pulitzer Prize submissions in the Feature Photography category over the past two years.

Both a website and on-line store were added to the business a few years ago. The on-line store has over 45 product offerings from photo aprons to 30"x40" gallery style canvas photographs. The on-line store mainly caters to event and sports photography customers.

November 2009 was a very busy month for the business with over 11,100 photographs taken and 1.08 million website hits. In the December 2009 edition of Shutterbug Magazine, one of the largest photography magazines in the country the business was featured.

Photography By Ty™ has a complete photography studio with four radio controlled studio lights and several different backgrounds. Out of the way location photography is also not a problem with portable power sources to power an array of lighting options.

January 2010 brings two new offerings to the business; dSLR camera sensor cleaning and a memory card recovery service. In the past local photographers using dSLR style cameras had to send cameras to the manufacture's repair centers to have the sensors cleaned or wait for a photography conference that offered sensor cleaning. Also with memory card recovery service photographers with accidentally deleted or formatted memory cards can most often have the photographs restored. Both new services are reasonably priced.
